

How to play custom music on hold via your AT&T SynJ® SB67138 or SB67158 phone.

Follow the steps below to begin playing custom music on hold messaging via your AT&T SynJ® SB67138 or SB67158 phone.

You'll need the music on hold player and custom cable provided by [OnHold.com](http://OnHold.com).

From the SB67138 or SB67158 base phone:

- Ensure the music on hold device is connected to the base phone Headset/AUX in jack with the cable provided by [OnHold.com](http://OnHold.com).
- Press the **Menu/Enter** button & scroll to **Base setup** & press **Enter**.
- Scroll to **Music On hold** & press **Enter**.
- Scroll to **MOH Source** & press **Enter**.
- Select **Aux In Device** & press **Enter**. You will see a message *Device connected to the headset jack will be used for MOH*.
- Scroll to **MOH on/off** & press **Enter**.
- Select **On** & press **Enter** to save the settings. You will again see a message *Device connected to the headset jack will be used for MOH*.
- Scroll to **Review MOH** & press **Enter**.
- Scroll to **Aux In Device** & press **Enter**.
- Exit when you are done reviewing the audio.

Please note: audio volume is adjusted via the external MOH device, not via the base phone.

You're ready to play your [OnHold.com](http://OnHold.com) custom music on hold marketing to every caller via your AT&T SynJ SB67138 or SB67158 phones!
